

# Paperless Solutions

Virtually Eliminate Paper Payroll Delivery for Your Clients

## Secure Solutions for Going “Paperless”

MPAY BPOs can now offer a variety of options to help employers virtually eliminate paper payroll delivery, while staying compliant with state regulations. These solutions allow employers to abolish pay-check printing, provide employees payment and viewing options, and receive reports and documents quickly and securely. Going “paperless” can help employers reduce printing costs, decrease administrative hassle, and improve information accuracy and delivery.

## Money Network® Payroll Distribution Service

With the Money Network® Payroll Distribution Service provided by Bank of America Merchant Services, employers can provide employees with the benefits of electronic pay while at the same time reducing administrative costs. This “pay to the penny” solution includes the Money Network® Card and Money Network™ Checks, enabling employers to comply with payroll distribution laws while providing a safe and convenient pay alternative for employees.

This is not your standard “pay card”; this service allows employees to write their own paycheck(s) from available funds in their account.

## MPAY’s SecureView Solution

Payentry.com now offers an integrated, secure document delivery solution. SecureView simplifies the management of delivering data securely including:

- Payroll Reports
- Quarterly and Year-end Tax Filing Reports
- Census data and more

With SecureView, your clients can access documents right in the payroll system and are one step closer to paperless payroll.

## ESS and Online Tax Forms

Employee Self Service not only gives employees online access to view contact information, earnings, deductions, taxes, accruals, and pay history, but also allows employees to view their Form W-2 or Form 1099 online! This service allows employees to see their tax forms earlier than paper forms and reprint as often as they want, reducing reprint requests to employers.
